

FOAM-WATER SPRINKLER HEAD

Description: Foam-water sprinkler is air-aspirating foam discharge outlet used in foam-water deluge systems. As foam solution flows through the inlet, air is also drawn into the body. It prevents flammable liquid risks by discharging foam in a predetermined pattern, also it can discharge water similar to standard spray sprinkler.

MODEL	EFF-FSH-020
Maximum Working Pressure	175 psi (12.Bar)
Surface Finish	Natural brass / chrome plated
Body	Bronze
Deflector	Brass
Agitator	Brass
K factor	K= 3.0 (43.2)
Connecting Thread	1/2 " R, 1/2 NPT
